GV-PoE Switch Version History: (GV-POE0801, GV-POE1601, GVPOE2401)

Firmware V1.04 2015-04-20

Fixed:

- Failure to correctly change the IP address of the POE switch through the IP Device Utility
- Incorrect display of MAC address and failure to display the hostname and IP address through GV-IP Device Utility

Firmware V1.03 2014-08-21

Fixed:

- Failure of GV-POE1601 / 2401 to be detected by GV-IP Device Utility and accessed through the Web interface when GV-POE1601 / 2401 are connected serially with another GV-PoE Switch through the SFP port
- Possible timeout error of the Web interface when there is system overload

Modified:

- Default STP setting to be enabled

Firmware V1.02 2014-03-24

New:

- Support for configuration through GV-IP Device Utility V8.6.0.0 to change IP address, enable/disable PoE function for a single port, and view port status

Firmware V1.01 2013-07-05

The version history applies to the following model:

- GV-POE0801

Fixed:

- Failure to access Web Management when multiple Ethernet devices are connected under the same LAN
