How does GV-LPR Camera work during the day and the night?

Article ID: GV4-13-05-08-k-2

Release Date: 05/08/2013

Applied to

GV-LPR Camera

Question

How does GV-LPR Camera work during the day and the night?

Answer

The GV-LPR Camera is designed to recognize the license plates. During the day, the camera shows gray-scale images to avoid color of the car interfering with the recognition.

During the night, the built-in IR LED illumination on the camera lights up to reflect the license plate to capture the best image for the recognition.
