GeoVision inc.

[FAQ]
Why LPR 5R v1.01 doesn't support local storage anymore?

Release Date: 7/09/2015

Applied to:

LPR 5R v1.01

Question:

Why LPR 5R v1.01 doesn't support local storage anymore?

Answer:

The main use of LPR 5R is to be connected to Multicam to do the license plate recognition. The reason why local storage is no longer supported is that, users can have more storage space for recording by having it recorded on hard drives instead of SD cards. In addition, it is rare that people only want "License Plate Number" info to be recorded to SD cards without applying recognition feature.
