[FAQ]

The live view of GV-LPR 10R v1.2 is just too dark

Release Date: 7/09/2015

Applied to:

GV-LPR 10 v1.2

Question:

What should we do if the live view of GV-LPR v1.2 is too dark?

Answer:

Please go change the shutter speed of the camera to "1/500" as shown below.

56:40	Play	<	Camera adjustment
			Default Save
			Brightness
		CHV.02/2	
		CUAL-OTOD	Contrast
			Sharpness
			Gamma
			Image Orientation
			Normal
			Slowest Shutter Speed
			Auto
		((12))	1/1000
		1.01-02223	1/2000 1/4000

For your information: A camera's shutter determines when the camera sensor will be open or closed to incoming light from the camera lens. The shutter speed specifically refers to how long this light is permitted to enter the camera. Slower shutter speeds are used with less light

1

so that light can enter the camera and illuminate the image.
