

## [FAQ]

# Is it possible to rename the backup center storage folders?

Release Date: 3/06/2015

### Applied to:

Backup Center V1.12

### Question:

What ports should I open in the router and modify on the GV-IP cam if I've got two cameras on the same router?

### Answer:

No, it is unable to rename the backup center storage folders.

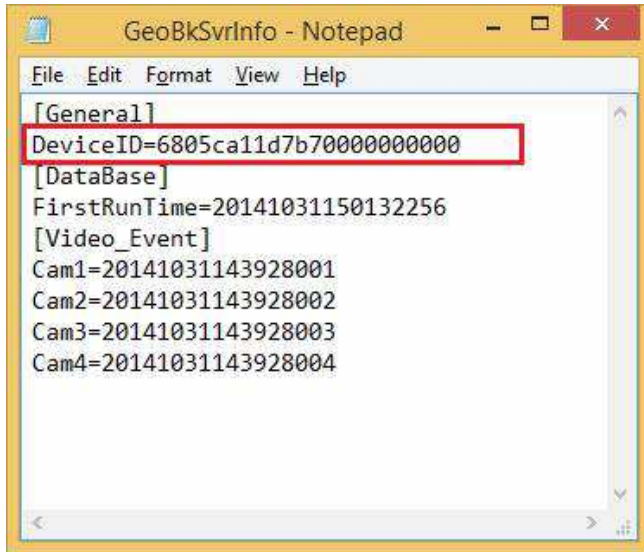

However, the following shows that how Backup center makes a folder name of hosts on local side.

NVR/DVR Side (Hosts):

1. Go to C drive - > Find "NVR" folder -> Click "GeoBkSvrInfo"

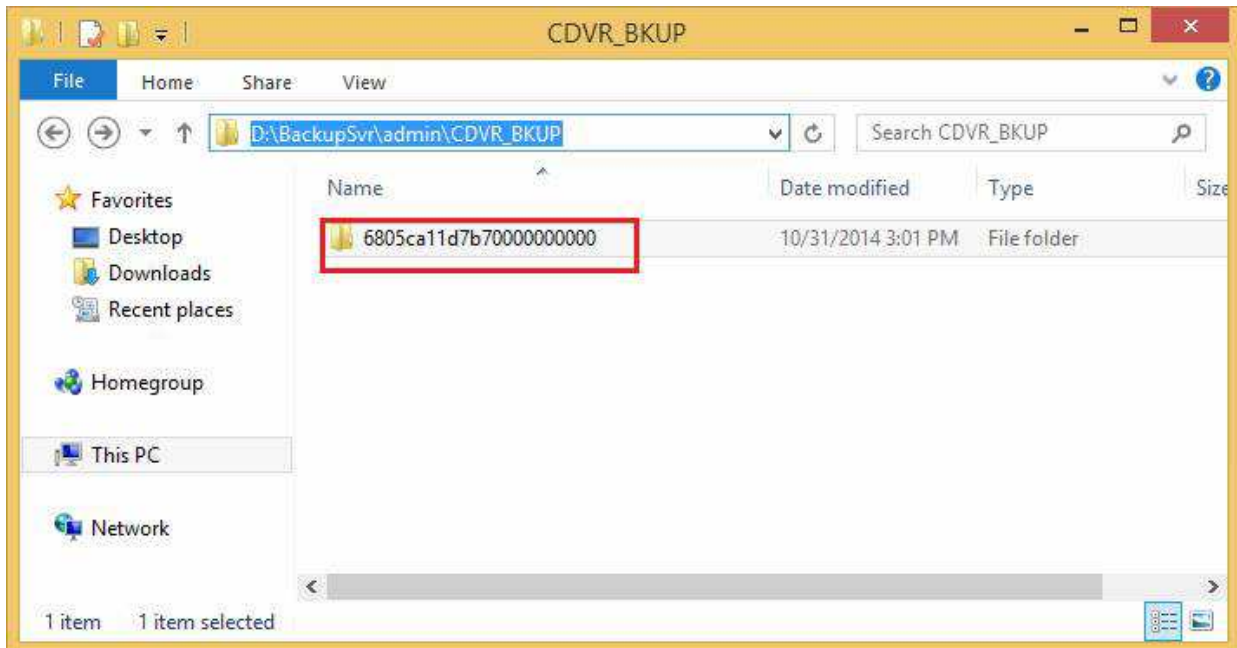

2. You will see a "DeviceID=6805ca11d7b70000000000" after clicking "GeoBkSvrInfo". This DeviceID is going to be used for creating the name of Host folder on Backup Center side.

Backup Center Side:

3. You will see a folder name that is exactly the same as the DeviceID we have on the pc with NVR/DVR installed.
