

[FAQ]

IP Cam record priority in NAS / SD card / USB device

Release Date: 1/29/2015

Applied to

GV-IP Cam 3.0

Question

IP Cam will put recording video in which storage

Answer

If NAS option is enabled, SD card inserted and USB device attached.

IP Camera will put records in NAS as high priority than others.

If SD card and USB device are both attached to IP Cam, it depends on the first partition that IP Cam recognized.

Disk Information						
Disk No.	Total Size	Used Size	Free space	Utilization	Remove	Format
