

## [FAQ]

### Is PoE supported for GV-SD200-S?

**Article ID: GV40-12-12-25-t-3**

**Release Date: 12/25/2012**

#### Applied to

GV-SD200-S IP Speed Dome (Outdoor model)

#### Question

Why is it that GV-SD200-S can be powered on by PoE, when support for PoE is not listed in the specifications table for GV-SD200-S?

#### Answer

Although GV-SD200-S can be powered on by PoE or High Power PoE, it is unable to provide the power source needed for the heater and fan in the outdoor model. Therefore, an external power adaptor is required to ensure normal operation of GV-SD200-S in outdoor environment.
