

[FAQ]

Can GV-System, GV-Center V2 and GV-VSM receive notifications for tampering events from GV-IP Camera or GV-Video Server?

Article ID: GV15-12-25-c

Release Date: 12/25/2012

Applied to

GV-IP Camera, GV-Video Server, GV-System, GV-Center V2, GV-VSM

Question

Can GV-System, GV-Center V2 or GV-VSM receive notifications when tampering alarm events from the host GV-IP Camera or GV-Video Server?

Answer

Yes. As long as the tampering alarm function is enabled on the GV-IP Camera or GV-Video Server (Figure 1) and the device is properly connected to GV-System, GV-Center V2 or GV-VSM, notifications will be sent when tampering alarm events occur. Figure 2 is an example of GV-System receiving tampering alarm notifications (log events).
