Article ID: GV12-2-26-t

Release Date: 2/26/2013

Applied to

GeoVision Products

Question

What is the maximum length of Ethernet CAT5 cable when connecting with GeoVision products?

Answer

The maximum cable length of Ethernet Cat5 cable that can be used is 100 meters (323 feet). However, this applies only to connections from a data switch / hub (data source) to your GeoVision products.
