

## [FAQ]

### **System has stopped recording and showing disk space low or recycle empty.**

The specific message is given when hard disk space is full.

To ensure continuous recording session, user should enable the recycle option under system configure (F9).

This may also be caused due to corrupted database files (\*.db files located under GV folder) User should then close down all GeoVision related software and execute repair database utility from the Windows Start menu to update or rebuild the database files.
