

[FAQ]

Why cannot I play the backup files in Multi View mode?

Article ID: GV11-07-25-j

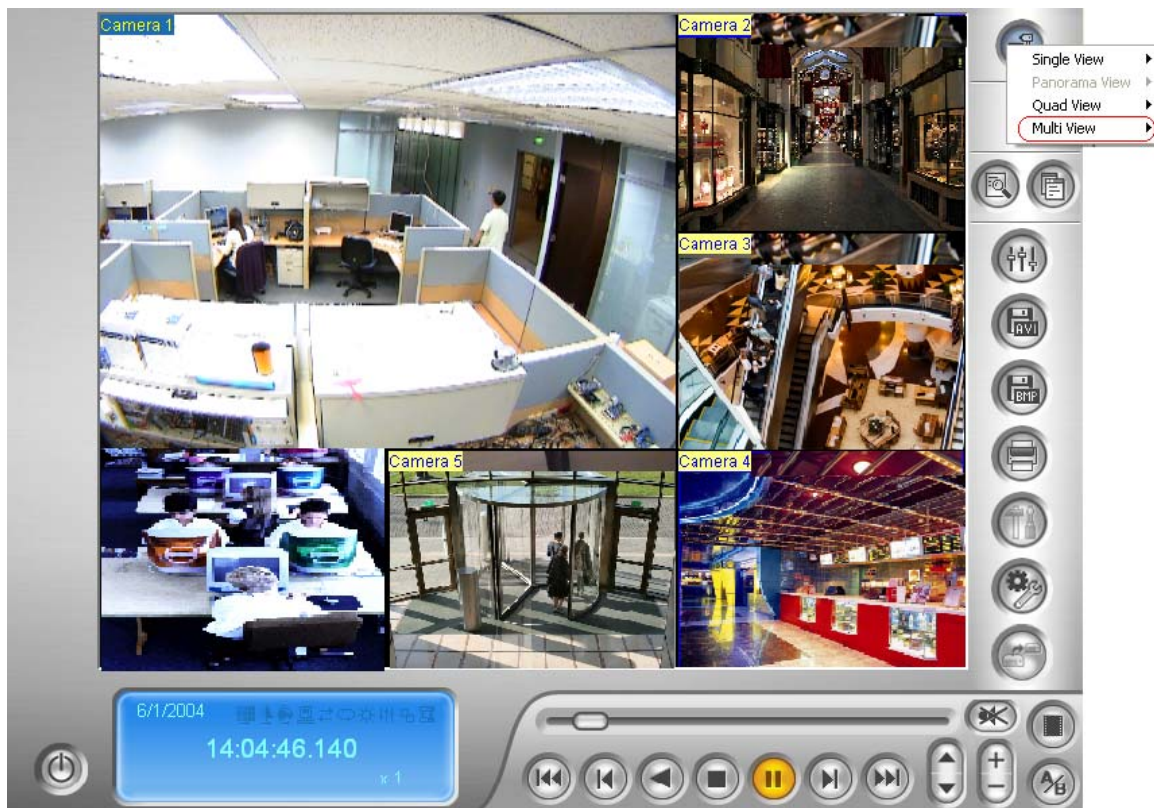

Release Date: 07/25/2011

Applied to

ViewLog and EZViewLog of all versions

Question

I've backed up several files through ViewLog. When I used the EZViewLog player to play the backup files, the files could only be played in Single View. How can I play the backup files in Multi View using the EZViewLog player?

Answer

To have Multi View playback mode, you must back up the recording files of 5 cameras at least.
