

[FAQ]

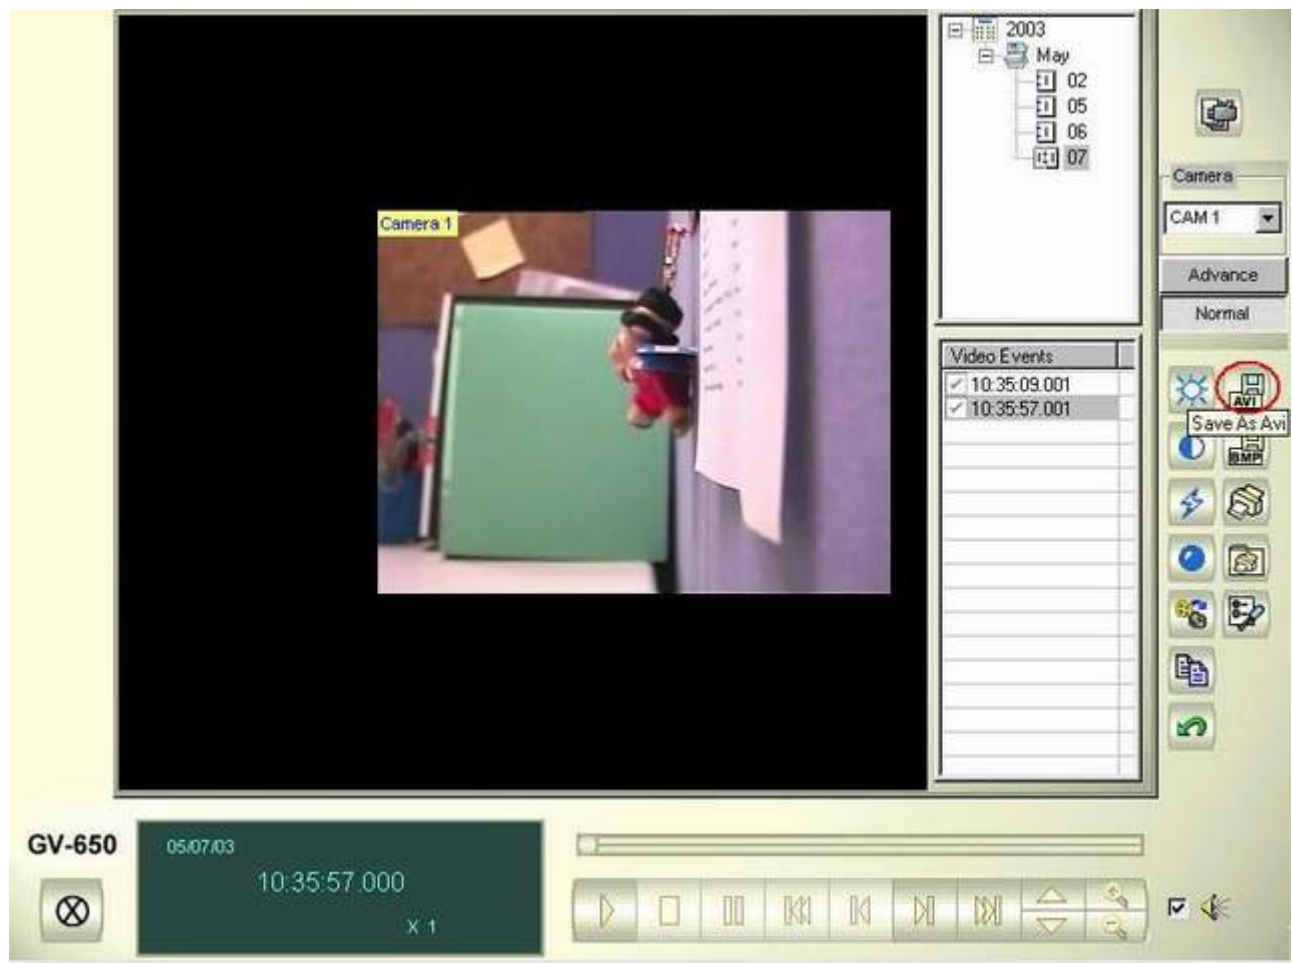

Play video in Windows Media Player with audio?

User has to export the video file using Viewlog to merge the audio data into video file in order to allow playback using Windows Media Player.

Step1. Select the video clip(s) you wish to save(merge), and then click on "Save as *.avi file" button.

Step2. Select "Video merge with audio" option from the menu.

Step3. Choose location to save your file.
