

[FAQ]

Why user account webcam restriction is not working on Multicam v8.6 when it is connected to GV-iview?

Release Date: 7/09/2015

Applied to:

GV-iview

Question:

Why user account webcam restriction is not working on Multicam v8.6 when it is connected to GV-iview?

Answer:

Due to company decision, we are not going to fix the issue because GV-iview is just too old to maintain. Please try to use our new software "GV-Eye" instead of using GV-iview.
