Release Date: 03/07/2013

Applied to

GV-iView and GV-iView HD

Question

How do I export the address book of GV-iView from one iOS device to another?

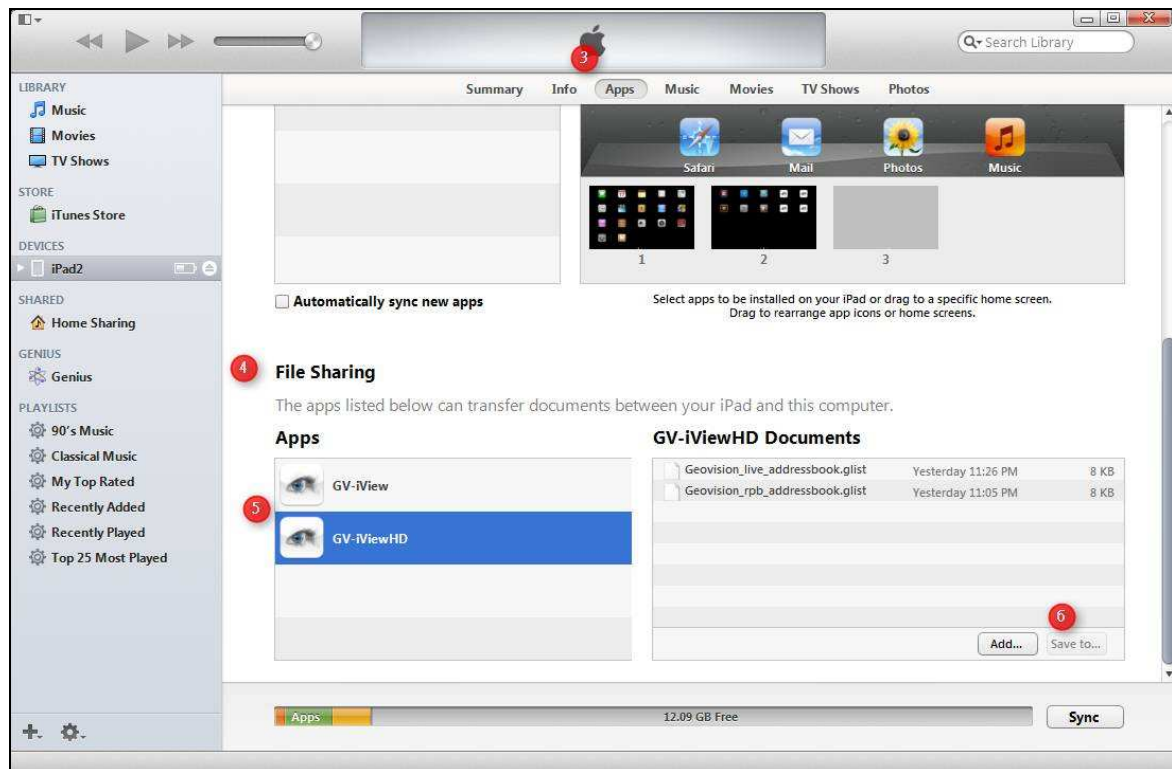

Answer

You can import/export address book of iOS device via Apple iTunes. Follow the steps below:

1. Press the **Import/Export** button in GV-iView or GV-iView HD to export the address book.

2. Connect your iOS device to a PC installed with iTunes.
3. After iTunes pops up automatically, select the device and click the **Apps** tab.
4. Scroll down to find **File Sharing**.
5. Under the **Apps** list, select GV-iView / GV-iView HD and you can find the documents shared by GV-iView / GV-iView HD on the right-hand column.

6. Click **Save to** button and select a folder to save the address book to your PC.
7. Connect another iOS device to this PC.
8. Repeat steps 3 to 5.
9. Click the **Add** button and select the address book you saved from the previous iOS device.
10. Press the **Import/Export** button in GV-iView or GV-iView HD to import the address book to this iOS device.
