Release Date: 05/14/2014

Applied to

GV-AView for Android Smartphone & Tablet (With DVR / NVR)

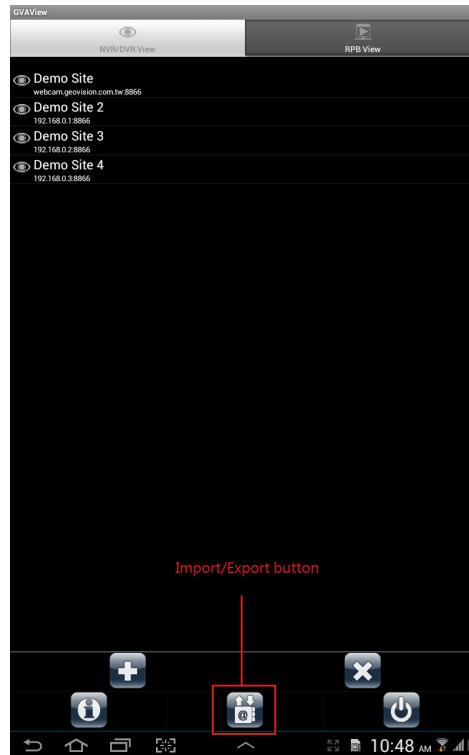

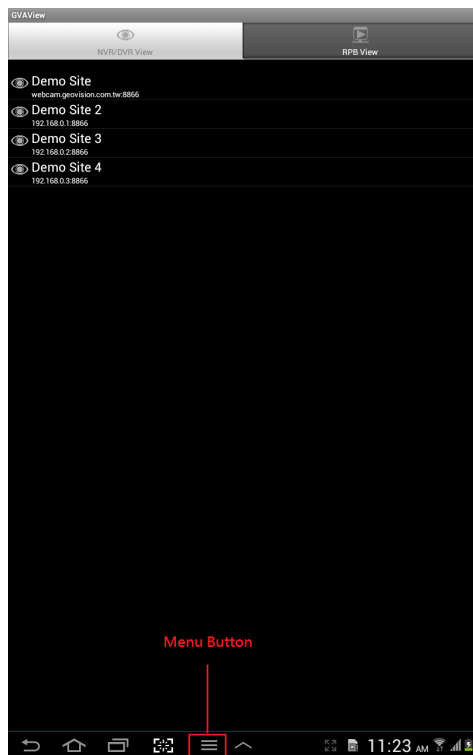

Question

How do I import and export the address book using GV-AView app?

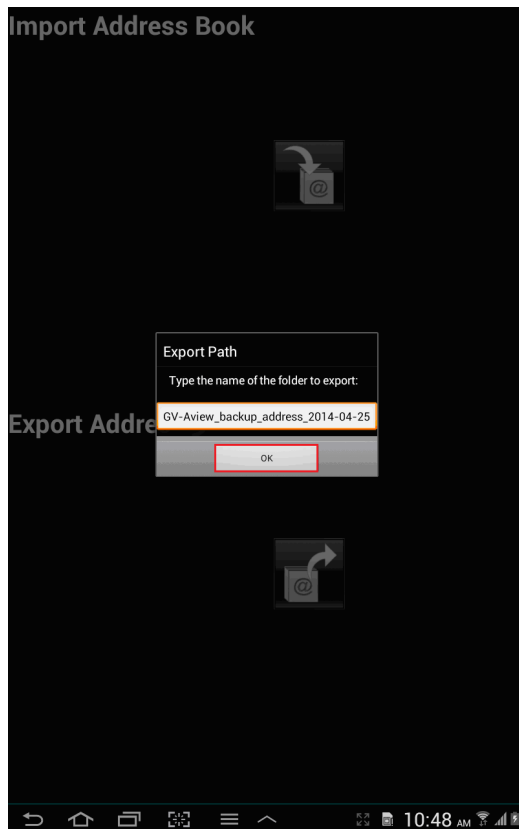

Answer

Follow the steps below to import and export the address book.

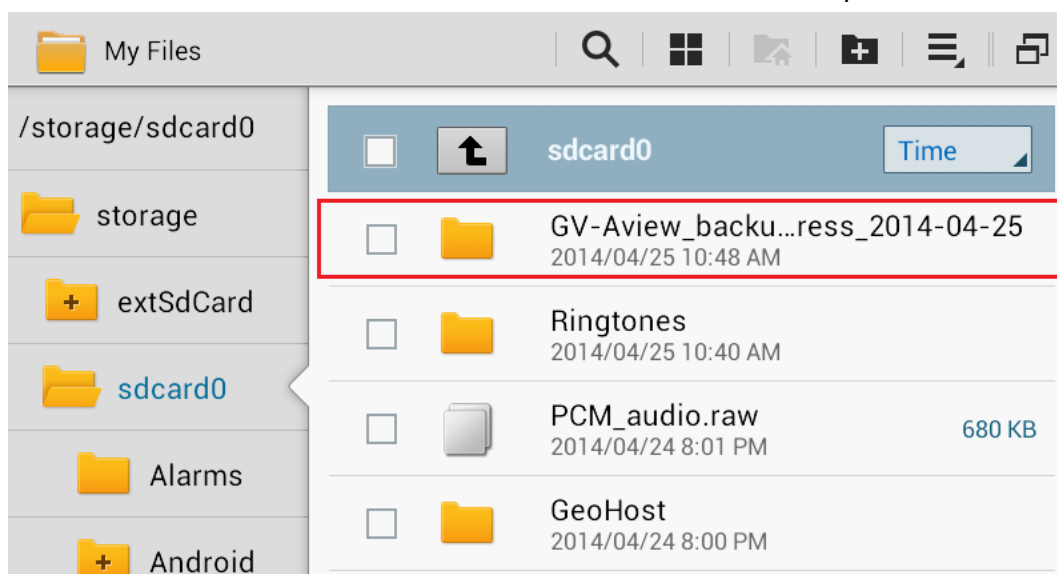

1. On the main screen of GV-AView, select the **Menu** icon  and select the **Import / Export** icon .

- To export the address book, select the **Export Address Book** icon , and select **NVR Address Book** or **RPB Address Book**. You may choose to change the name of the export file or choose the default name. Select **OK** to export the address book.

- The address book will be generated to a root menu. From the root menu, you can send the address book to another Android device through e-mail or USB connection by copying the address book from the Android device or SD card to the computer.

4. To import the address book, repeat Step1, select the **Import Address Book** icon , and select **NVR Address Book** or **RPB Address Book**. Select the specific file existing in the root menu. Select **OK** to import the address book.
