Applied to

GV-Eye (Smartphone App for iOS and Android)

Question

Does GV-Eye support dual streams when connecting to a GV-IP Camera?

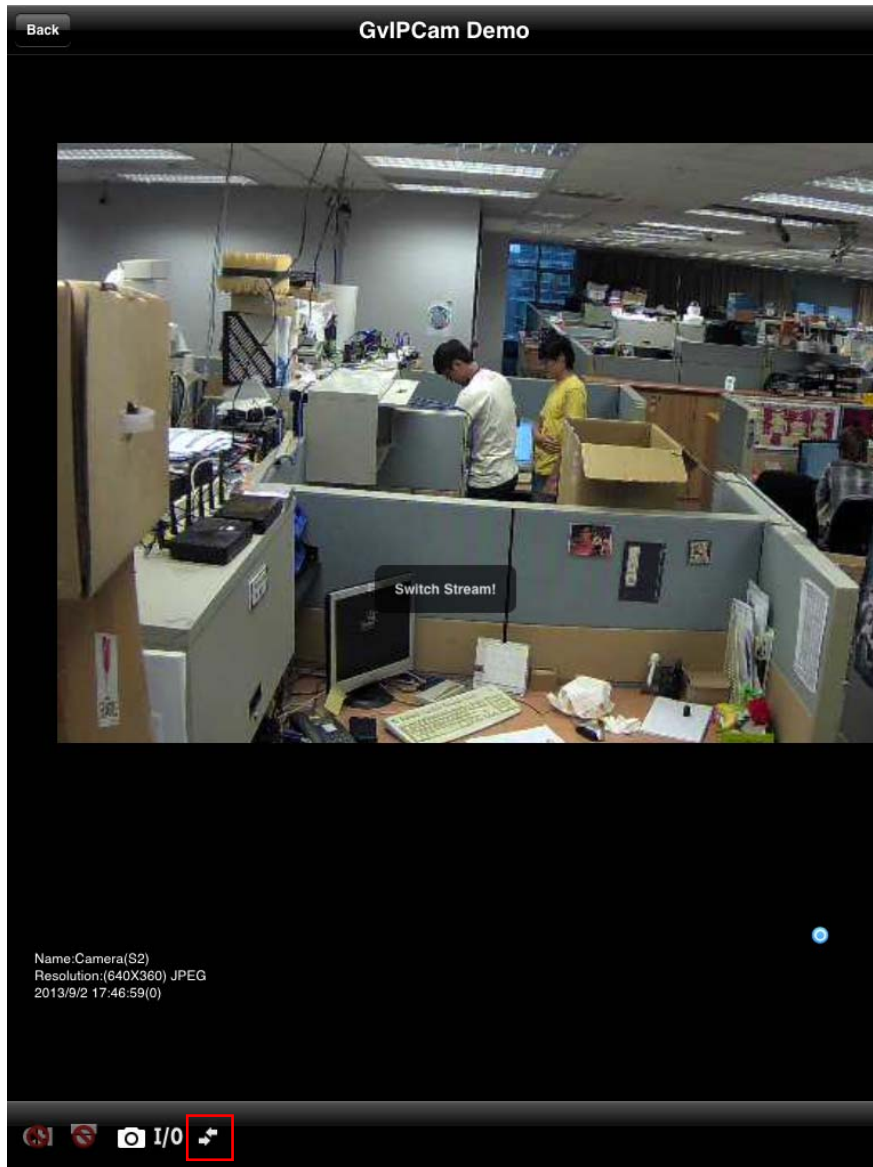

Answer

Yes. By default, the streaming is set to stream 2 for live view when connecting to a GV-IP Camera. You can switch to stream 1 according to the following instructions.

For iOS Users

The Stream Switch function for GV-Eye application is available on the live view interface. Find

the switch stream button  on the screen. Tap the button to switch the streaming.

For Android Users

The Stream Switch function for GV-Eye application is available on the live view interface. Find

the switch stream button  on the screen. Tap the button to switch the streaming.
