

GeoVision Outdoor Cameras Outlasted Typhoon Dujuan

Article ID: GV3-15-10-02-a

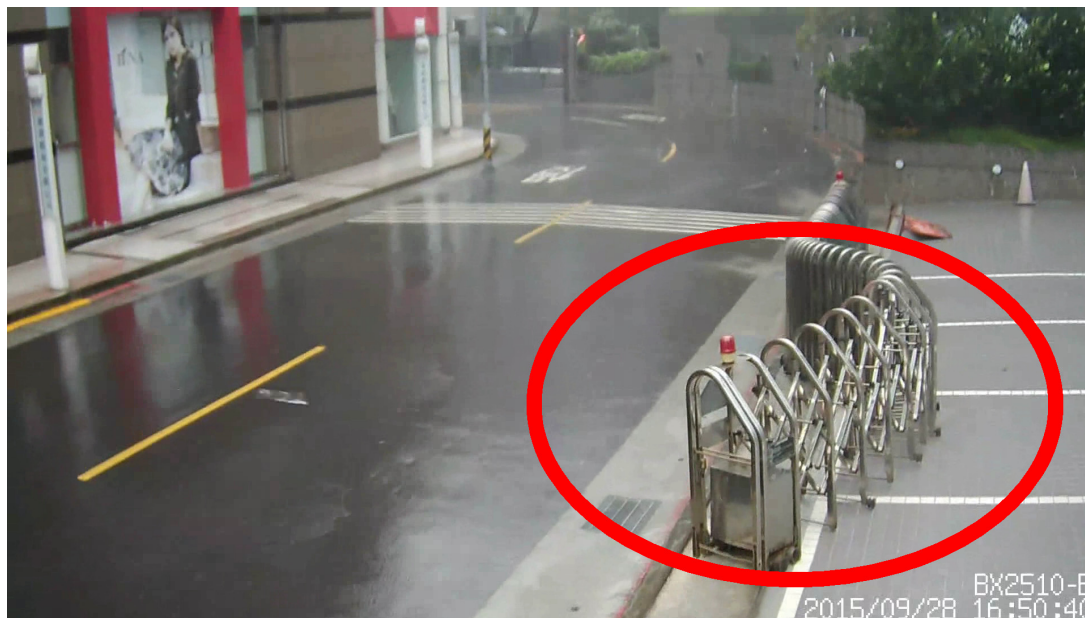

Release Date: Oct. 2 2015

GeoVision outdoor cameras outlasted Typhoon Dujuan, which battered Taiwan with gusts of up to 227 km/h (141 mph) and more than 900 mm of rain within just one single day. Typhoon Dujuna caused destructions such as landslides, road closures and power failure, bringing down shop fronts, trucks, and motorcycles. Given the circumstances, GeoVision Bullet IP Camera, Vandal Proof Dome, Arctic Box IP Camera, and LPR Camera still managed to weather the storm as indicated in the photo below:

The following link exemplifies the way typhoon Dujuan thumped Taiwan with its howling winds and torrential rain: https://www.youtube.com/watch?v=IMgj_RRzI7s Starting from 00:03, we can observe how the blast bended the barrier whereas GeoVision outdoor cameras rode out the storm.

Featured with vandal resistance (IK10 for metal casing) and ingress protection (IP67), GeoVision cameras persisted in recording high quality images even when confronting against a super typhoon.

GeoVision Outdoor Cameras

Camera Type	Bullet IP Camera	Vandal Proof Dome	Arctic Box IP Camera	LPR Camera
Model	BL1210	VD1530	BX1500-E	GV-LPC1100
