

Recommended Hard Disk Drives for GeoVision Software

Article ID: GV02-18-01-18-AI

Release Date: 01/18/2018

Applied to

Computers installed with any GeoVision Software

Summary

To maintain system stability and to keep your recordings safe when using GeoVision software, we advise you to use any of the recommended hard disk drives listed below.

Recommended Hard Disk Drives

Brand	Series
Western Digital	Gold Enterprise-class
Seagate	Enterprise Capacity level
HGST	Ultrastar series

Note: The spin speed must be at least 7200 rpm and the read/write speed 110 MB/s or above.

Average Read and Write Speeds

Hard disk drives can be worn down mechanically over time and they may contain broken sectors. To maintain the performance and stability of your hard disk drive, make sure you use a hard disk drive with the R/W speed of 110 MB/s or above. Below is an example:
